

## System 21 *e*-Learning

# IADC WELLCAP<sup>®</sup> COILED TUBING

This advanced and in-depth coiled tubing well control System 21 e-Learning course is designed to provide a foundation of knowledge in pressure control during coiled tubing operations. The latest information and technologies are presented for maintaining control of the well during coiled tubing well intervention activities. It meets and/or exceeds the training requirements of the International Association of Drilling Contractors (IADC) and WCS curriculum guidelines.

All course materials will be provided to the student. Upon successful completion of this course, the student will receive supervisory level IADC and WCS certifications.

## Learning Objectives:

- Reasons for Performing Coiled Tubing Operations
- Coiled Tubing Pressure Basics
- Influx Fundamentals
- Gas Characteristics & Behavior
- Procedures
- Well Control Techniques (Methods)
- Complications & Solutions
- Forces on Coiled Tubing
- Coiled Tubing Equipment
- Drilling/Completion Workover Fluids

## Target Audience:

- Coiled Tubing Supervisors, Operators, Assistant Operators

## Certifications:

- IADC WellCap®
- The Well Control School®

## Benefits:

- Self-paced
- Cost savings
- On-demand
- 24/7 support

Course Duration: 4.5 days or 37 hours (self-paced instruction)
